PROJECTS

SchoolPro Academic Management System *Technologies Used: Java, Spring Boot, Spring Security, MySQL, Maven, PDF Generation API*

- Architected a full-stack enterprise solution with a complex relational database architecture for managing academic records.
- Implemented advanced security layers using **Spring Security**, featuring **BCrypt password hashing** and **OTP verification**.
- Developed a dynamic reporting module to generate **on-the-fly PDF report cards** and academic analytics.
- Successfully pushed the finalized project to a remote GitHub repository for version control and deployment.

Online Job Portal System *Technologies Used: Java, JSP, Servlets, JDBC, MySQL, HTML, CSS*

- Developed a web-based job portal that allows job seekers to register, upload resumes, search for jobs, and apply online.

- Created dedicated portals so employers can post job vacancies and view applications.
- Implemented MVC architecture using JSP and Servlets to ensure scalable and maintainable code structure.
- Integrated MySQL for storing user and job data efficiently.
- Added user authentication and role-based access control to secure user sessions and restrict platform access based on account type.
